

## **Micurae, MiAid and Mantle Join Forces: A one-stop destination for specialist healthcare.**

Busy lives and the obvious implications of the pandemic have prompted a need for the healthcare industry to adapt and innovate. Amongst many of the amazing advancements that have been made in recent times, the developments in and widespread adoption of telehealth services across the globe certainly stand out. As a necessary progression, Micurae, MiAid and Mantle are proud to announce a partnership to enhance the patient-centred specialist telehealth experience through the one ecosystem.

Micurae is a cross-border telehealth platform designed to provide premium medical expertise and a broad range of allied services to patients across the globe. Strictly compliant with Australian Health Regulations and the Health Insurance Portability and Accountability Act (HIPAA), the B2B platform streamlines tasks such as medical record compilation, translation, reporting and international payment to facilitate an otherwise time-consuming, legally challenging process.

Supported further by an ambulatory care/ outpatient medical services app, MiAid, users can now rest more easily knowing that high quality, expert healthcare services are at their fingertips. The MiAid app offers the user instant tele-access to a language-matched, highly trained customer care staff member who can onboard doctors and interpreters for 3-way tele-consultation. The process is enhanced by the app's connection to nearby pharmacies for prescription and non-prescription medications.

Mantle is a specialist video telehealth service aimed at prevention, treatment, and performance enhancement. Their service is all about providing access to high quality psychological support at a time and place that is most convenient to the individual, with minimal wait times. Although their service was initially designed for men based on an evidence-informed approach, clinician training and specialist experience, they are now seeing increasing engagement from all genders. Mantle's client outcomes remain high across the board, emphasising the expertise of their team and their capacity to engage, support, challenge and motivate action, regardless of the background of the person using the service.

Micurae and MiAid already complement each other to create a cross-border, multi-platform ecosystem where healthcare can be delivered anywhere, anytime. Mantle has been added to the multidisciplinary ecosystem as a collaborating partner, delivering vitally important specialist psychological support. The result, a one-stop destination for specialist healthcare.

The collaborative efforts, based on strong values alignment, of Micurae, MiAid and Mantle yields an unbeatable combination of expertise and dedication to patient care.
